

WIPRO CAPSTONE PROJECT

Test Plan

BlazeDemo Flight Booking Automation Framework

Selenium WebDriver · TestNG · Maven · ExtentReports · Jenkins · Docker

Project Name	BlazeDemo Flight Booking Automation Framework
Document Type	Test Plan
Prepared By	Mr. Baivab Sarkar
Mentor/ Trainer	Mrs. Vaishali Sonanis
Application Under Test	BlazeDemo
URL	https://blazedemo.com/
Repository	ThisIs-Developer/Wipro-Capstone-Project
GitHub Link	https://github.com/ThisIs-Developer/Wipro-Capstone-Project
Date	13 th June 2026

1. Test Plan Identification: Blazedemo_FlightBooking

2. Introduction

The BlazeDemo Flight Booking application is a web-based demonstration platform that simulates a complete airline ticket purchasing workflow. The application enables users to search for available flights between origin and destination cities, view search results, select a preferred flight, complete a passenger and payment details form, submit a purchase, and receive a booking confirmation upon successful transaction.

3. Test items

The following application pages are identified as test items within the scope of this plan:

Page / Module	Components Under Test
Home Page	Application URL, page title, departure city dropdown, destination city dropdown, Find Flights button
Flight Results Page	Flight availability table, available flights count, Choose This Flight buttons for each listed flight
Purchase Page	Airline information, flight number, flight price, total cost display, passenger name field, address field, city field, state field, zip code field, card type dropdown, credit card number field, expiry month field, expiry year field, name on card field, Purchase Flight button
Confirmation Page	Success message, purchase ID, booking status, booking amount, card number, booking date

4. Features to be tested

The following functional areas and specific test actions are in scope for execution:

a) Home Page

- Verify application URL matches https://blazedemo.com
- Verify page title is present and correct
- Verify departure city dropdown is displayed and selectable
- Verify destination city dropdown is displayed and selectable
- Verify Find Flights button is present and clickable

b) Flight Search Results

- Verify flight availability table is displayed after search
- Verify count of available flights is greater than zero
- Verify Choose This Flight buttons are present for each listed result

c) Purchase Page

- Enter and verify passenger name field
- Enter and verify address field
- Enter and verify city field
- Enter and verify state field
- Enter and verify zip code field
- Select and verify card type from dropdown
- Enter and verify credit card number field
- Enter and verify expiry month field
- Enter and verify expiry year field

- Enter and verify name on card field
- Submit purchase and verify form submission

d) Booking Confirmation

- Verify success message is displayed on confirmation page
- Verify purchase ID is generated and displayed
- Verify booking status is shown correctly
- Verify booking amount is displayed
- Verify card number (partial) is displayed
- Verify booking date is present and correct

5. Features not to be tested

The following testing types and application areas are explicitly excluded from the scope of this test plan:

- Application performance testing
- Security testing
- API testing
- Load testing
- Stress testing

6. Testing approach

The following testing types and application areas are explicitly excluded from the scope of this test plan:

- Functional Testing
- End-to-End Testing
- Data-Driven Testing
- Negative Testing
- Regression Testing
- Smoke Testing
- Cross-Browser Testing

7. Item pass or fail criteria

- Total Test Cases: 4
- Success Criteria: 100% (All 4 out of 4 test cases must pass)
- Failure Criteria: 0%

8. Suspension criteria and resumption requirements

1. Suspension criteria
 - a. Application server unavailable.
 - b. Mama Bug
 - c. Defects everywhere
 - d. Critical system problem.
 2. Resumption criteria
 - a. Server restored.
 - b. Critical defects fixed.
- Suspension date: To be decided
 - Resumption date: To be decided

9. Test deliverables

- Test plan document
- Test case Excel
- Defect report(JIRA) + Excel
- Testcase analysis report
- Automation framework Code
- GitHub repository
- Automation workflow video

10. Environment

Hardware Requirements: Laptop or desktop computer

Software Requirements

Component	Details
Java	Java Development Kit (JDK) 25
IDE	Eclipse IDE
Build Tool	Apache Maven 3
Browser	Google Chrome, Firefox, Edge
Automation Library	Selenium WebDriver
Test Framework	TestNG
Reporting	ExtentReports
Logging	Log4j2
CI/CD Server	Jenkins
Containerisation	Docker
Version Control	Git and GitHub

11. Responsibilities:

- a) Trainer: Mrs. Vaishali Sonanis
- b) Tester: Mr. Baivab Sarkar

12. Staffing and training needs

- a) Team size: 1 Tester
- b) Training required: 2 months

13. Schedule:

Activity	Duration	Planned Day
Requirement Analysis & Test Plan Preparation	1 Day	Day 1
Test Case Design & Test Data Preparation	1 Day	Day 2
Automation Framework Setup (Maven, TestNG, POM Structure)	1 Day	Day 3

Page Object Development	1 Day	Day 4
Test Script Development	1 Day	Day 5
Reporting, Logging, Jenkins & Docker Integration	1 Day	Day 6
Test Execution, Defect Reporting, Test Summary Report & Project Review	1 Day	Day 7

14. Risks and contingencies: N/A

15. Approvals

- a) Trainer: Mrs. Vaishali Sonanis
- b) Tester: Mr. Baivab Sarkar
